MARS WITHIN 30 DEGREES OF THE LUNAR NODE by Anthony of Boston

In 2019, I discovered a pattern in which the time frame of Mars's position within 30 degrees of the lunar node correlates with the highest concentration of rocket fire into Israel in relation to the rest of the year. I undertook a longitudinal study showing how this was the case in real time. Since 2020, I have used social media such as Reddit to prove this thesis. Here are the stats

https://www.academia.edu/124394993/Gaza_Only_Gaza_rocket_stats_and_planet_Mars_correlation_Hamas_and-Islamic_Jihad_rocket_fire_against_Israel_since_2005

The parameter that I used to make the verbal prediction of escalated rocket fire into Israel within a given year involved observing when Mars would be within 30 degrees of the lunar node **within the calendar year**. What I mean by that is for my predictions, I only used the timeframe when Mars would be within 30 degrees of the lunar node between January and December — the calendar year essentially. If the transit of Mars being within 30 degrees of the

lunar node started near the end of the year and carried over into the next, I did not apply it for my predictions of escalated rocket fire. The parameter is that when Mars would be within 30 degrees of the lunar node within the calendar year(January — December), one could predict that the concentration of rocket fire into Israel during that time would be higher compared to the other times of the year. Mars is typically within 30 degrees of the lunar node for roughly 3 to 3.5 months.

Here is an example. Here are all the dates of when Mars would be within 30 degrees of the lunar node between 2020 and 2025. I carried out the prediction of rocket fire 6 times. However, the number of times Mars is within 30 degrees of the lunar node between 2020 and 2025 was 8 times. Take a look.

Jan 15, 2020 — April 3, 2020

Feb 9, 2021 — May 13, 2021

Nov 4, 2021 — Jan 22, 2022

June 22, 2022 — Sept 19, 2022

Dec 26 2022 — Jan 24, 2023

Aug 24, 2023 — Nov 15, 2023

April 12, 2024 — June 25, 2024

June 5, 2025 — Sept 4, 2025

What I did was omit the dates of which Mars within 30 degrees of the lunar node started at the end of the year and carried over into the next. This constraint was inserted for the sake of simplicity and also consistency of methodology in order to ensure reliability and comparability of results. This leaves us with the following six set of dates between 2020 and 2025 of which one could predict when the highest concentration of rocket fire against Israel would occur within the calendar year of January thru December:

Jan 15, 2020 — April 3, 2020

Feb 9, 2021 — May 13, 2021

June 22, 2022 — Sept 19, 2022

Aug 24, 2023 — Nov 15, 2023

April 12, 2024 — June 25, 2024

June 5, 2025 — Sept 4, 2025

All six years of predicting that the highest concentration of rocket fire against Israel would occur during the timeframe of Mars being within 30 degrees of the lunar node within the calendar year turned out to be accurate. Here is a brief video of the actual rocket fire data, showing how escalation periods correlated with the alignment of Mars being within 30 degrees of the lunar node just as I predict each year.

Please note that while not included in that dataset, Iran's missile attacks are operating on that same Mars/lunar node timeline that applies to rocket attacks from Gaza. Iran's first attack against Israel was on April 13th 2024, when they fired 300 missiles at Israel in an unprecedented attack just as Mars entered within 30 degrees of the lunar node. Later in 2024 in the month of October, the amount of missile fire from Iran was 180 — less than the amount fired during the Mars-within-30-degrees-of-the-lunar node phase back in April of that year. This case of Iran still affirms the thesis that the highest concentration of rocket fire would occur during the Mars/lunar node alignment. Also notice in the video, that when I called down fire from heaven in 2024 and 2025, I didn't single out Gaza militants. I referenced Israel's enemies as a whole, which underscores the intuition involved in this. In the predictions prior to 2024 and 2025, I would always predict rocket fire to come from Gaza.

Here in 2025, on June 13th while Mars is within 30 degrees of the lunar node, intense missile fire from Iran has commenced again and is the most

devastating as of now. Below, I put the social media posts predicting the escalation in advance, as well as the community reactions.

Here is the 2025 prediction

The scientific postulate is that the gravitational effect between earth and Mars causes temperature changes which in turn impacts human behavior. I posit that when Mars is positioned behind the sun and within 30 degrees of the lunar node, the cumulative gravitational forces acting upon the earth

pulls earth's axial tilt closer to the sun, warming the planet and increasing human propensity for violence. This study from 2024 asserts that Mars affects Earth's climate via its gravitational tug, giving some credence to the thesis that I am presenting about Mars influence on terrestrial events.

<https://www.science.org/content/article/mars-may-be-having-profound-impact-earth-s-deep-ocean-currents/>

“The Moon causes both high and low tides, but it’s not the only celestial body that impacts Earth’s waters. Mars’s gravity influences our planet’s deep-ocean currents, according to a study reported in Nature Communications this week. By comparing more than 50 years of deep-sea drilling records with shifts in Earth’s orbit, researchers found that the gravitational tug of Mars on Earth is causing it to wobble slightly on its axis. Every 2.4 million years, Mars’s orbit comes close enough to Earth that its gravity can affect it, tilting Earth’s usual path and orientation. This orbital shift causes Earth to be exposed to more sunlight, warming the climate, which, in turn, stirs up ocean currents and makes them stronger. However, some researchers doubt that Mars’s weak gravitational pull is the true cause of these changes, New Scientist reports.”

Quick note: There are attempts to remove evidence of these predictions from the internet. Here is a backup of this article with all links archived
